Cooling Systems

- freshSense
- Your fridge knows what your food needs: freshSense. Even the slightest changes in temperature, like the sun shining on the fridge freezer, can affect the conditions inside the fridge – and thus the freshness of your food. To prevent this, freshSense measures the temperature on the inside and the outside of the fridge and knows when the surrounding conditions change. As soon as a change is registered, the control system immediately takes countermeasures to ensure your food stays fresh for as long as possible.
- noFrost: No more defrosting: the noFrost technology.
- With noFrost, a ventilation system diverts the humidity from the freezer compartment. As a result, the air remains dry. This reliably prevents frost from forming on the inside of the appliance or on your food.
- superFreezing: Freeze super large quantities super fast: superFreezing.
- To prevent thawing of frozen foods when placing large quantities of new food in the freezer, simply activate the superFreezing button before going shopping. The appliance will then automatically cool down to a temperature as cold as –30 °C so that newly stored foods do not interrupt the freezing process.

Convenience & Safety

- multiAirflow: Ensures even cooling at all levels: the multiAirflow system.
- The multiAirflow system circulates the air evenly in the refrigerator compartment for constant temperatures. Foods recently placed inside are cooled faster. And the fresh food quality is preserved better.
- multiAlarm system: Always reliable: the multiAlarm system.
- The multiAlarm system notifies you visually and acoustically when the temperature rises, which can happen for example if the door is left open.
- LED lighting: Brings more light into the dark: LED lighting.
- The new integrated long-lasting LED lights are flush in the side walls or ceiling and illuminate the interior uniformly and perfectly without blinding you.
- varioZone: Flexibly use the freezer compartment: the varioZone
- You can remove drawers and the glass shelves between the drawers, allowing you to customise your freezer space
- icemaker: The integrated icemaker makes as many ice cubes as you want, whenever you want them.
- holidayMode: holidayMode
- The holidayMode setting gives you energy-saving cooling while you're away.
